# Artisan Interiors

Plaster is one of the most ubiquitous building materials and product applications seen around the world.

The versatile Rockcote Natural Materials range of lime, clay plasters or our mineral plasters as modern hand applied finishes brings to life any interior surface.

Smooth, polished, rustic, textured, undulating – the choices are wide and varied. Whether you are building new, or refreshing an existing space our Artisan Interior finishes will enhance your space.

By working with natural clays, limestone and natural minerals we have created a wide range of products and at the same time are reviving ancient skills and application techniques to create bespoke, tactile natural surfaces.

The craft and skill of our Professional Artisan Plasterers will create surfaces that enhance and showcase your project.

The ability of our lime & clay plasters to ‘breathe’ and absorb vapour make them the perfect choice for modern projects.

Our Lime & Clay plasters contain <1.0% V.O.C’s so you can enjoy a fresh, healthy atmosphere wherever you work or play.

As a Resene Group business we offer a wide variety of colours from within the Resene Total Colour System, or we can create bespoke colours to match or complement your other interior surfaces.

Whether in hospitality, retail, commercial or private residences, the popularity of our bespoke Artisan Interior Plaster Finishes is without rival.

**Clay Decor** as with all our Natural Material plaster finishes has tactility and warmth for a stunning natural aesthetic that brings a sense of relaxation and ease to any space.

# Clay Decor

<1.0% voc

**Clay Plasters are natural materials formulated to create a clay plaster finish for use over modern substrates.**

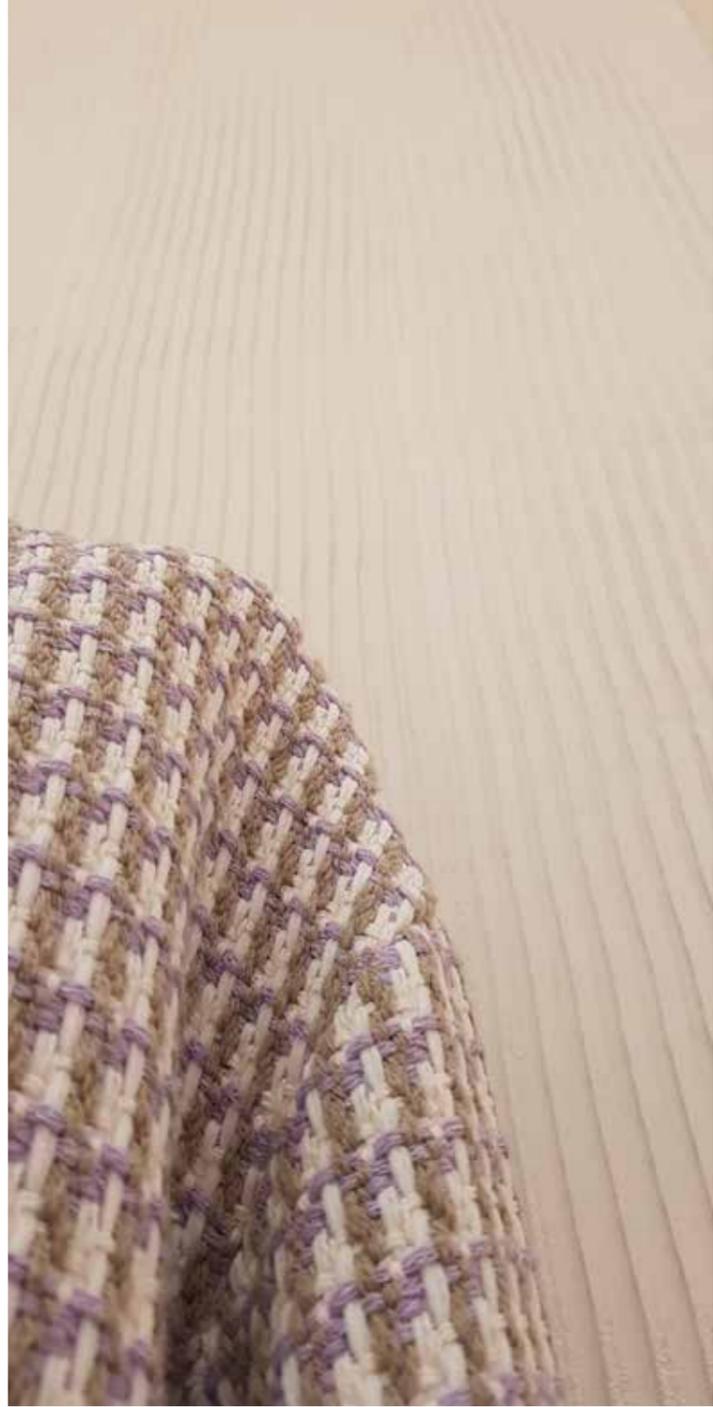

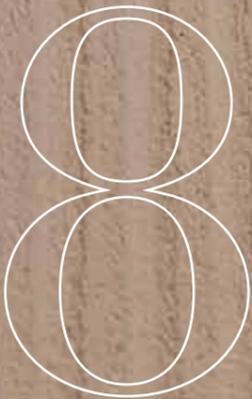

Our clay plasters are our softer, rustic and more porous interior surface, allowing the building to breathe.

Clay plasters have an inherent thirst for interior vapour that assists to regulate relative humidity inside the home.

A wide range of finishes can be achieved by skilled Rockcote Artisan Plasterers

Products Used: Earthen Render

# Clay Decor

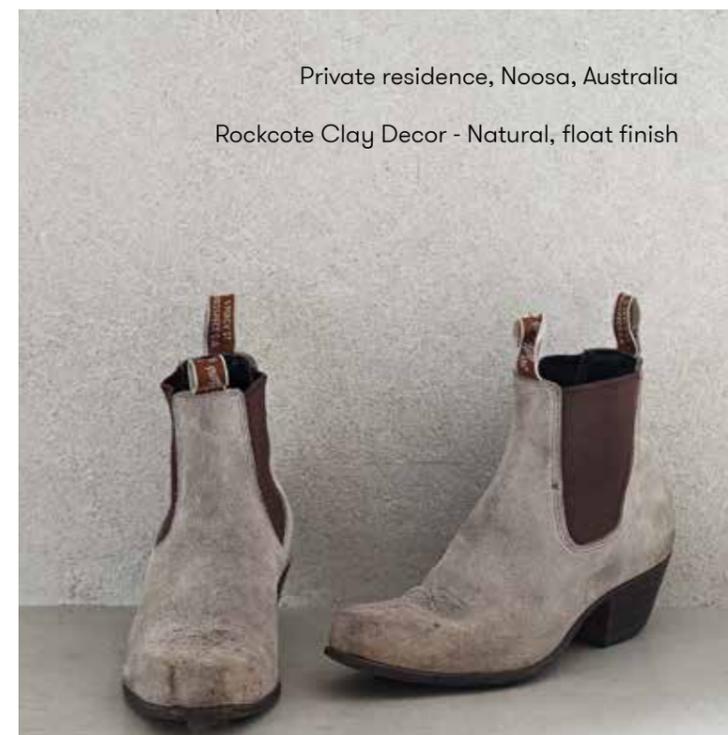

ROCKCOTE Clay Decor can be used to achieve a classic rendered finish, trowelled, float or sponge finish with the unique appeal that only natural renders can deliver.

ROCKCOTE Clay Decor is supplied in a powder form, off white colour that can be tinted to a wide range of colours from within Resene's The Range Whites & Neutrals.

Bespoke colours can also be created on request.

It can be protected from water splashes with Resene waterborne Aquapel

# Marrakesh

<1.0% voc

Our most ancient of plaster finishes.

Based on Moroccan tadelakt which was originally used as a technique to waterproof earthen structures, the ability to effectively and hygienically store water was a major development. It was not long before tadelakt became recognized as an unbelievably beautiful finishing technique that could be pigmented and applied on almost any surface.

Tadelakt became a highly prized surface treatment that was widely applied in the traditional north African hammams, and royal palaces.

We have designed our ROCKCOTE Marrakesh to emulate this very traditional and beautiful surface finish.

Basecote & Marrakesh

# Marrakesh

ROCKCOTE Marrakesh is a natural lime plaster finish for use over modern substrates.

ROCKCOTE Marrakesh is supplied as a dry powder in an off white colour that can be tinted to a wide range of colours from within Resene's The Range Whites & Neutrals.

Bespoke colours can also be created on request.

Marrakesh allows the experienced Rockcote Artisan Plasterer to create an individual work of art on any wall or room within the home.

Many different styles of finish can be achieved using different trowels, floats, sponges and finishing techniques

20

# Velvetina

Rockcote Velvetina is designed to produce a durable and hard wearing finish with a serene, natural look.

Traditionally known as *Intonachino* it is particularly useful for finishes where a combination of lightly polished closed, and coarser open areas is sought.

Rockcote Velvetina, scratched and smoothed

24

# Velvetina

<1.0% voc

ROCKCOTE Velvetina is a strong, medium-grained decorative plaster finish with a distinctive velvety appearance, with less drama than the highly polished Rockcote Venetian Plaster, and harder drying characteristics than our Otsumigaki and Clay Decor.

As a natural lime plaster, Velvetina is a breathable surface finish and can be used on a wide variety of wall surfaces, including modern plasterboard and concrete, as well as traditional building materials with stunning results.

Velvetina is a durable, distinctive surface coloured by Resene.

# Otsumigaki

<1.0% voc

Our traditional Japanese inspired plaster. The beauty of ROCKCOTE Otsumigaki lies in its ability to create textural depth with a smooth, flat surface.

Create stunning, bespoke interior surfaces that are durable, and beautiful to view and feel.

ROCKCOTE Otsumigaki can be tinted to a wide variety of colours within the Resene colour ranges.

ROCKCOTE Otsumigaki can be applied over most prepared interior substrates, also over our range of traditional natural plasters such as ROCKCOTE Earthen Clay Renders.

# Concrete Effects

Fine finishing plasters  
that create the look & feel of  
concrete.

38

Inspired by nature

# Concrete Effects

Our Artisan plaster finishes have evolved through the expertise of our Artisan plasterers, techniques and tools that produce realistic concrete surfaces over a multitude of standard substrates.

Finishes can vary dependant on the product selected and the technique applied to achieve highly burnished and polished through to satin sheen distressed concrete.

Any of our Artisan Plasterers can achieve the look and feel of concrete.

Our most recent innovation is Rockcote Cerano as it can be applied not only to the interior, but also the external wall surface as well, allowing you to bring the outside in and the inside out.

# Natural Mineral

For a very natural grey and fine sand surface look no further than our Natural Mineral range.

These products combine traditional sands, cement and binders for superb durability and hardness.

These finishes can be left natural or overcoated with Resene paint finishes to complement other interior surfaces with the added appeal of textural change.
